PROFILE

Mobile software engineer specializing in React Native and TypeScript. Built and launched APEX, an AI fitness and nutrition app for iOS and Android, as its sole engineer. Previously progressed from frontend engineer to Product Lead at Pear Protocol, leading five engineers and one designer as the protocol reached \$500M in trading volume.

EXPERIENCE

APEX Lifting and Diet Coach · apexfitness.app

Founder & Engineer | 2025 - Present

- Built and launched an AI fitness and nutrition app on the App Store and Google Play using React Native, Expo, and TypeScript, with a Node.js backend and Firebase/Firestore.
- Owned product design and engineering end to end, including the mobile UI, backend, landing page, and Jest tests.
- Designed a model-agnostic AI architecture that separates server-side application decisions from generated text rendered as UI objects; integrated Claude, OpenAI, and Gemini.
- Implemented offline-first storage with MMKV, Realm, and AsyncStorage, and asset streaming for 1GB+ of exercise media to reduce the app bundle size.
- Built AI coaching, photo-based meal recognition, body composition analysis, and progressive overload features that account for the user's diet phase.

Pear Protocol · pear.garden

Formerly Reimagined Finance | Remote | Nov 2021 - Nov 2024

Product Lead | 2023 - 2024

- Led five engineers and one designer across product design, engineering, hiring, and strategy.
- Led product and engineering as protocol trading volume grew from \$0 to \$500M; iterated features based on trading usage and shipped integrations including SYMMIO.

Lead Developer | 2022 - 2023

- Led three engineers and owned end-to-end GMX and Vertex trading integrations that enabled the public beta launch.

Software Engineer, Frontend | 2021 - 2022

- Designed and built the React and TypeScript frontend for the original yield protocol.

Content Writer & Copywriter | 2017 - 2021

Wrote product and conversion copy as a freelancer, then as the owner of a small online agency.

TECHNICAL SKILLS

Mobile: React Native, Expo, iOS, Android, offline-first architecture, MMKV, Realm, AsyncStorage

Web & backend: TypeScript, JavaScript, React, Next.js, Node.js, Firebase, Firestore, REST APIs

AI & quality: LLM integration, multimodal AI, prompt design, Jest, GitHub Actions

Web3: wagmi, viem, ethers, Solidity, self-custodial DeFi integrations

EDUCATION & LANGUAGES

University studies in Languages, focused on English - three years completed.

Spanish: native · English: fluent
