PROFILE

Product-focused software engineer with +5 years of experience building and launching products across web, mobile and AI. Built APEX, an AI fitness and nutrition app for iOS and Android, as its sole engineer. Previously progressed from frontend engineer to Product Lead at Pear Protocol, leading five engineers and one designer as the protocol reached \$500M in trading volume.

EXPERIENCE

APEX Lifting and Diet Coach · apexfitness.app

Founder & Product Engineer | 2025 - Present

- Built and launched APEX from 0-to-1 as its sole product engineer, owning product design, backend architecture, mobile development, testing, and App Store / Google Play release.
- Built the app with React Native, Expo, and TypeScript, backed by Node.js, Express, and Firebase/Firestore; streamed 1GB+ of exercise media to keep the app bundle lean.
- Designed a model-agnostic AI backend across Claude, OpenAI, and Gemini, combining deterministic training and nutrition logic with generated recommendations, streaming responses, and provider fallback.
- Engineered offline workout and nutrition workflows with persistent mutation queues, optimistic UI updates, automatic retries, and failed-sync recovery using MMKV, Realm, and AsyncStorage.
- Implemented iOS and Android subscriptions with server-side purchase verification, lifecycle webhooks, and premium feature access controls.
- Shipped AI coaching, photo-based meal recognition, body composition analysis, and progressive overload features tailored to the users' diet and workout plans.

Pear Protocol · pear.garden

Formerly Reimagined Finance | Remote | Nov 2021 - Nov 2024

Product Lead | 2023 - 2024

- Led five engineers and one designer across product design, engineering, hiring, and strategy.
- Led product and engineering as protocol trading volume grew from \$0 to \$500M; iterated features based on trading usage and shipped integrations including SYMMIO.

Lead Developer | 2022 - 2023

- Led three engineers and owned end-to-end GMX and Vertex trading integrations that enabled the public beta launch.

Software Engineer, Frontend | 2021 - 2022

- Designed and built the React and TypeScript frontend for the original yield protocol.

Content Writer & Copywriter | 2017 - 2021

Wrote product and conversion copy as a freelancer, then as the owner of a small online agency.

TECHNICAL & PRODUCT SKILLS

- **Product & leadership:** 0 → 1 product development, product strategy, technical leadership, hiring, product design
- **Frontend & mobile:** TypeScript, JavaScript, React, React Native, Expo, Next.js, iOS, Android, Sentry
- **Backend & data:** Node.js, Express, Firebase, Firestore, Redis, REST APIs, Zod, webhook integrations, subscription billing, offline-first architecture, MMKV, Realm, AsyncStorage
- **AI & quality:** LLM integration, multimodal AI, prompt design, Claude, OpenAI, Gemini, Jest, Supertest, GitHub Actions
- **Web3:** wagmi, viem, ethers, Solidity, self-custodial DeFi integrations
- **Tools:** Claude Code (primary), Cursor, OpenAI Codex, agent skills and workflows, Vercel, Render

EDUCATION & LANGUAGES

University studies in Languages, focused on English - three years completed.

Spanish: native · English: fluent
