

Angel Gomez

Product Engineer, React Native, React, TypeScript

Santiago, Chile, ajgcdev@gmail.com, +56 9 8514 8403
github.com/4gnle, 4gnle.com

PROFILE

Product engineer with 6+ years of experience building and launching web and mobile products. Built and launched APEX, a production React Native fitness and nutrition app for iOS and Android, as its sole engineer, covering product design, frontend, backend, AI systems, testing, and releases. Previously progressed from frontend engineer to Product Lead at Pear Protocol, remaining hands on while leading five engineers and one designer as the product grew from zero to \$500M in cumulative notional trading volume.

EXPERIENCE

APEX Lifting and Diet Coach, apexfitness.app

Founder and Product Engineer, 2025 to Present

- Built and launched APEX from zero to one as its sole product engineer and designer, shipping a production app on iOS and Android that has reached 100+ signups.
- Architected the product with React Native, Expo, and TypeScript, supported by Node.js, Express, Firebase, and Firestore, with production APIs built for reliability, performance, and scale.
- Engineered offline first workout and nutrition workflows using MMKV, persistent mutation queues, optimistic UI updates, automatic retries, and failed sync recovery.
- Built Apple and Google subscription flows with Expo IAP, including server side purchase verification, subscription lifecycle handling, and premium access controls.
- Designed a model agnostic AI backend across Claude, OpenAI, and Gemini, with provider fallback, task specific model selection, streaming responses, defensive output handling, and recovery from unpredictable model failures.
- Built and tested production mobile workflows including OTA updates, EAS builds and releases, CI/CD, Sentry monitoring, and platform specific debugging.

Pear Protocol, pear.garden

Formerly Reimagined Finance, Remote, November 2021 to November 2024

Product Lead, 2023 to 2024

- Led five engineers and one designer while remaining hands on across product development, frontend engineering, backend integration, technical planning, hiring, mentoring, and feature planning with the wider team.
- Planned and implemented trading product improvements with the team, including a complex fee, rebate, and discount system and the SYMMIO integration, working directly with its team to connect derivatives APIs and market maker infrastructure while optimizing the experience for speed, reliability, and usability.
- Led product and engineering during a period in which Pear grew from zero to \$500M in cumulative notional trading volume and generated more than \$200K in fees within roughly one year.

Lead Developer, 2022 to 2023

- Led three engineers and owned the GMX and Vertex integrations across wallets, smart contracts, APIs, GraphQL, market state, transaction flows, interface states, performance, error handling, and reliability, enabling the public beta launch.

Software Engineer, Frontend, 2021 to 2022

- Designed and built the original React, Next.js, and TypeScript frontend, including wallet integration, transaction state, financial interfaces, responsive layouts, and the core product experience.

Content Writer and Copywriter, 2017 to 2021

Wrote product and conversion copy as a freelancer, then ran a small online agency where I also designed and built WordPress websites and implemented simple PHP logic.

TECHNICAL AND PRODUCT SKILLS

Frontend and mobile. TypeScript, JavaScript, React, React Native, Expo, Next.js.

Backend and data. Node.js, Express, Firebase, Firestore, Redis, REST APIs, GraphQL.

Mobile systems. Offline first architecture, Expo IAP, OTA updates, EAS, Sentry.

AI and quality. LLM integration, multimodal AI, provider fallback, Jest, Supertest, GitHub Actions.

Web3. wagmi, viem, ethers, Solidity integrations, wallet and smart contract integrations.

Product and leadership. Product strategy, zero to one development, product design, UX and UI, technical leadership, hiring, mentoring.

EDUCATION AND LANGUAGES

University studies in Languages, focused on English, three years completed.

Spanish, native. English, fluent.
